

The world right now is a pretty shitty place...

This is how I envision our future...

How to make the world a little bit less shitty...

- Focus on things that matter
- Don't give in to the man
- Experiences not possessions
- Look to nature
- Look to other cultures
- Protect the environment
- Teach the next generation
- Think very big
- Engineer for the future
- Fuck profits
- Think outside the box
- Enjoy everything
